EDUCATION

York University

Bachelor of Engineering (B.Eng.) in Computer Engineering

Toronto, ON

Sep. 2025 – Apr. 2029

- **Academic Standing:** GPA: A (Top-tier academic performance)
- Expected specialization in Artificial Intelligence & Machine Learning.
- Relevant Coursework: Applied Calculus I & II, Discrete Mathematics, Linear Algebra, Programming for Engineers.

EXPERIENCE

Undergraduate Researcher — Space Geodesy Lab

Jan. 2026 – Present

York University — Research Fellowship

Toronto, ON

- Conducting data-driven research on extreme weather events using satellite observations and climate model datasets.
- Engineering scientific Python workflows for automated data acquisition and multi-dimensional analysis.
- Developing AI-driven machine learning models to characterize hurricane evolution and assess infrastructure impact.
- Working under the supervision of **Dr. Spiros Pagiatakis**.

Vice President — MBH&Co.

Jan. 2026 – Present

B2B Subscription-Based Digital Business Directory Platform

Toronto, ON

- **Co-founded** a platform enabling businesses to register and manage profiles through **gated access control**.
- Engineered **dynamic dashboards** using **Wix Velo (JS)** for subscription tiers and **role-based permissions**.
- Designed a **data ingestion pipeline** integrating automated CSV workflows with structured CMS collections.
- Developed **validation systems** with **analytics tracking** to monitor engagement and vendor interactions.

Class Representative & Peer Note-Sharing Volunteer

Sep. 2025 – Present

Student Accessibility Services (SAS), York University

Toronto, ON

- Represented students in **MATH 1013/1028** and **PHYS 1801**, acting as a liaison with instructors.
- Organized calculus review sessions supporting academic performance and accessibility standards.

Event Coordinator

Sep. 2025 – Dec. 2025

Iranian Students Association at York University (ISAYU)

Toronto, ON

- Planned and coordinated cultural events, managing logistics, university policy, and safety protocols.
- Collaborated with executive teams and vendors to execute events while maintaining budget control.

PROJECTS

UniSpot | Go, React, PostgreSQL, Supabase, Mapbox, WebSockets

Feb. 2026 – Present

- Architected a real-time campus intelligence platform using **React** and **Go (Gin)**.
- Engineered a **js** synchronization pipeline using **Gorilla WebSockets** and **PostgreSQL LISTEN/NOTIFY**.
- Implemented geospatial querying with **PostGIS** and interactive mapping via **Mapbox GL**.

Undercut | Go, FastAPI, Next.js, PostgreSQL, Docker

Jan. 2026 – Feb. 2026

- Developed a live full-stack platform aggregating listings with a concurrent **Go** scraper.
- Engineered a **Market Analysis** engine for Total Cost of Ownership (TCO) factoring in depreciation.
- Leveraged **Gemini 1.5 Flash** for multi-modal analysis of descriptions and red-flag detection.

HawkEye | Python, Flask, Google Gemini API, Docker, Tailwind CSS

Jan. 2026

- Built an AI-powered tool converting raw inventory videos into structured data using **Gemini 2.5 Flash**.
- Engineered a custom **FFmpeg** pipeline for frame extraction to optimize AI processing time.

LassondeHub | Supabase, PostgreSQL, JS, Tailwind, Vercel

Jan. 2026

- Built a centralized engineering resource platform with **Supabase Auth** and **PostgreSQL** backend.

AlgoDrift | Next.js, TypeScript, Tailwind, Framer Motion

Dec. 2025

- Developed an interactive platform for visualizing DSA using **Framer Motion** transitions.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, Go (Golang), C++, HTML5, CSS3, MATLAB

Frontend: React, Next.js, Tailwind CSS, Mapbox GL, Vite, Framer Motion, Supabase Auth

Backend & DB: Node.js, Express, WebSocket, Supabase, PostgreSQL, Firebase

Tools & AI: Git, GitHub, Docker, Linux, Vercel, Render, OpenCV
